Scottish Charity: SC031618
Glasgow is Scotland’s largest city renowned for its culture, style and the friendliness of its people. It is the gateway to the Trossachs, the beautiful West Coast and the Highlands of Scotland. The city offers a blend of internationally-acclaimed museums and galleries, stunning architecture, vibrant nightlife, fantastic shopping and a diverse array of restaurants and bars. Glasgow was crowned European City of Culture in 1990 and awarded the UK’s City of Architecture and Design in 1999. The city centre has many impressive Victorian structures and several unique masterpieces of one of the city’s most celebrated sons, the legendary architect and designer Charles Rennie Mackintosh. The centrally-located Scottish Exhibition Centre (SEC), location for the Conference, is within a short walk of many hotels. The social programme will include a visit to the Royal College of Physicians and Surgeons of Glasgow.

4-6 September  European Board of Medical Assessors Conference
5-6 September  3rd International Summit on Competency Based Medical Education
              ESME Courses
              Pre-conference Workshops
6 September     Conference opening and first plenary (evening)
7-9 September   Plenaries, symposia, research papers, doctoral reports, short communications, posters, eposters, conference workshops; (conference closes 1245 hrs)

Medical education in 2020 – have our predictions at AMEE 2000 been achieved?

A paradigm shift in medical education – where are we going?
The changing roles of the teacher – how far have we come?

What can we learn from failure? There is reluctance to publish and present on interventions that have not worked, yet we have much to learn from them. Abstracts will be invited on this theme.

Introducing sustainable health care into health professions curricula: Climate change is inextricably linked to the health of nations. What educational interventions are needed to help future health professionals become more sustainable in their practice? Abstracts will be invited on this theme.

AMEE Live: As part of the sustainability theme, we are looking to extend AMEE Live to allow some speakers unable to attend in person to present from their home institution.
