

Develop Your Educational Career
CONNECT, GROW AND INSPIRE

24th – 28th August 2024

Provisional Programme

Online

About Basel

1. Basel, Switzerland, is a place of exciting contrasts.
2. A city with historical buildings next to modern architecture.
3. Where a young and dynamic art scene exists alongside world-renowned museums.
4. Cosmopolitan ambience here, lively traditions there.

Basel, Switzerland, serves as a nexus of connection, growth, and inspiration. Its international character, economic vitality, cultural richness, and commitment to education collectively contribute to a dynamic environment that fosters personal, professional, and creative development.

Connect: Basel serves as a major international crossroads due to its strategic location at the meeting point of Switzerland, France, and Germany. This geographical position fosters cultural exchange, business interactions, and a diverse community.

The city's multilingualism, with residents commonly speaking German, French, and Swiss German, facilitates connections between people of different backgrounds and nationalities.

Grow: The University of Basel, with its long history and commitment to education and research, plays a crucial role in the intellectual growth of the city. Students and scholars contribute to the city's dynamic and vibrant atmosphere.

Inspire: Basel's rich cultural scene, including its numerous museums and art institutions, provides inspiration for both residents and visitors.

The historic Old Town, with its medieval architecture and landmarks like the Basel Minster, serves as a source of inspiration, connecting the present to the city's rich past.

Basel's commitment to sustainability and environmental initiatives inspires residents and businesses to contribute to a greener and more sustainable future.

Conference Theme

The theme of AMEE 2024 is 'Develop your educational career: connect, grown and inspire with AMEE 2024'.

AMEE 2024 will focus on how best to: engage with existing knowledge to guide practice, develop new knowledge, and consider how what we do is useful for learners, patients, and society.

AMEE 2024 will promote and inspire excellence, collaboration, and scholarship across the continuum of health professions education.

The Transformative Power of Artificial Intelligence: Revolutionizing Health Professions Education – a one day AI Symposium

This session will consist of 9 highly interactive sessions designed to highlight the most relevant topics related to health professions education.

Date: Sunday 25th August

Time: 0830-1600hrs

PROGRAMME

Welcome and Introduction

Session 1: Fundamentals of AI in Health Professions Education

Session 2: AI-Powered Personalized Learning

Session 3: AI in Simulation and Virtual Reality in Healthcare Education

Session 4: AI in Assessment and Feedback

Session 5: Data-Driven Insights for Curriculum Enhancement

Session 6: Ethical Considerations and Bias in AI Education

Session 7: Implementing AI Tools in your Institution

Session 8: Future Trends and Preparing for Change

Session 9: Student Approaches to Using AI for Learning and Assessment

Closing Remarks. The sessions offer a mix of interactive lectures and group work sessions

Attendees will participate in discussions and hands-on activities to understand how AI can advance their educational practice and how the challenges they expect to face in their institutions can be addressed.

Location: Hybrid – In Person and Online

Registration Fee:

In Person: TBC

Online: Included in the online registration fee.

Register Online: Registration will open in January 2024

SUNDAY 25 AUGUST

0830–1600 **The Transformative Power of Artificial Intelligence: Revolutionizing Health Professions Education Symposium**

1800–1930 **Plenary (Live Stream)**

Welcome to AMEE 2024

Subha Ramani (AMEE President), Anne Lloyd (CEO), Local Representatives

1A – Plenary – the Ronald Harden Plenary: Jim Campbell, WHO

WHO recommends a focus on self-sufficiency for the health workforce, which requires a scale up of production of health workers of 8–12% per year in most countries to meet the Sustainable Development Goals. This requires a focus on both the quality and quantity of health worker education, with consideration of their skills mix, geographical distribution, labour market dynamics and decent employment conditions. In this keynote, Jim Campbell will explore the global trends and best practices with a view to identifying the key strategic priorities and opportunities to strengthen education and respond to employment and population health needs.

Jim Campbell is the Director of the Health Workforce Department at the World Health Organization in Geneva. He oversees the development and implementation of global public goods, evidence and tools to inform investment in the education, employment and retention of the health and care workforce in pursuit of global health security, universal health coverage and the Sustainable Development

Goals. His portfolio includes measuring the impact of the COVID-19 pandemic on the health and care workforce, implementation of WHO's Global Strategy on Human Resources for Health: Workforce 2030, and support to countries within the Working for Health action plan to implement the recommendations of the UN High-Level Commission on Health Employment and Economic Growth. He coordinates the Global Health Workforce Network engaging member states and all relevant partners in WHO's work, with special focus on the contributions, rights and roles of women and youth in the health and care sector. He has published extensively, is a member of the Editorial Board of the Human Resources for Health Journal and provides advisory inputs to multi-sectoral programmes on COVID-19 recovery, social spending, education and employment.

Entertainment

MONDAY 26 AUGUST

0100–0200 – Short Communications

0115–0245 – Workshop

0930–1100 – Workshop

1100–1230 – Session 3: Plenary (Live Stream)

3A – Plenary – Liz Grant, University of Edinburgh, UK

COP28 held in December 2023 hosted the first fully dedicated health day providing irrefutable evidence to the global community of climate scientists, policy makers and politicians that the climate crisis is a health crisis. The health day humanised the climate conversations, making explicit what had been hidden beneath global stocktake analysis and Nationally Determined Contributions planning. Beneath all the figures and graphs are

people who are suffering because of the way that we have been living. Over 140 nations signed the COP28 Declaration on Climate and Health. While it is non-binding sitting outside the formal UNFCCC decision making as a non-negotiated call to action it does mean that now our health ministries will be inside the 'climate tent' negotiating, rather than outside separated from the discussions and decisions which are changing the very nature of health and the infrastructure of health systems. Behind the Declaration on Climate and Health is a movement. Over 40 million health professionals have added their signature to the WHO call for leaders to be far more ambitious for a future that is healthier, fairer, and greener. No other community has such solidarity in the climate space, with solidarity comes strength, but also responsibility.

Liz Grant holds a chair in Global Health and Development. She is responsible for developing and supporting global health partnerships with colleagues in low- and middle-income country (LMIC) communities, and for local and global advocacy translating global health research into action.

Liz is a co-director of the University of Edinburgh's Global Compassion Initiative developing work on the value base of the Sustainable Development Goals, the science of compassion, and the contribution that faith communities make to the SDGs.

Liz has led the development of a suite of global health MSc programmes, MOOCs and coordinates the Global Health PhD programme all specifically designed for students from resource constrained countries. She currently is the Co-Director of the Masters of Family Medicine and the MSc in Global Health Challenges.

Her own research interests span planetary health and palliative care in contexts of poverty and conflict – new beginnings and better endings.

She sits on the Scottish Government NHS Global Citizenship Board.

Liz was on the Board of Directors for the Consortium of Universities for Global Health, (CUGH), an association of over 170 Academic institutions training in Global Health, and currently chairs the CUGH Research Committee. Previously Liz was the Senior Health Advisor to the Scottish Government's International Development Team working primarily in Malawi. She has worked for NHS Lothian's Public Health Directorate leading an NHS HIV partnership between the NHS and Zambia. She has been an advisor to a number of global health charities and serves as a trustee for CBM Scotland.

ASPIRE-to-Excellence Awards

1400-1530 – Session 4: Simultaneous Sessions (Live Stream)

Symposia 4A

An international overview of adapting and adopting a Planetary Health and Sustainable Healthcare curriculum

SanYuMay Tun, Nicolas Senn, Wentao Zhou, Eva-Maria Schwienhorst-Stich, James Irlam, Felicity Connolly

Symposia 4B

Clinical reasoning and its teaching: What is the role of artificial intelligence?

Silvia Mamede, Andrzej Kononowicz, Wolf Hautz, Geoff Norman, Henk G. Schmidt

0930–1100 – Workshops

1100–1230 – Session 11: Plenary (Live Stream)

11A – Plenary – Jamiu Busari, Horacio Oduber Hospital, Aruba / Maastricht University, the Netherlands

Aristotle, medicine, and the search for an accurate definition of social justice in health professions education: An explorative inquiry

Who is Aristotle, and what do his teachings have to do with social justice and the (un)hidden prejudices in health profession education (HPE)? In medical training programs, there is the assumption that the curricula offer all students equal opportunities during training. However, marginalized learners, i.e., those who lack the stereotypical qualities (or physical features) defined by the profession, often experience exclusion, implicit prejudices, or unfair treatment during their (clinical) training. In this plenary lecture, we shall use the philosophical teachings of Aristotle to explore (un)hidden prejudices and discrimination in healthcare and HPE. We shall reflect on how (un)acquired privileges influence professional behaviour and the need for more social justice in our HPE programs.

Jamiu Busari is an associate professor of medical education at Maastricht University (NL) and an adjunct professor and scientist at the Institute for Disability and Rehabilitation Research, Faculty of Health Sciences, Ontario Tech University (Canada). He is also a consultant pediatrician at the Horacio Oduber Hospital (Aruba). Jamiu is a Certified Canadian Physician Executive, Harvard Macy Scholar, and an HBS executive education graduate in Managing Health Care Delivery. He is a former executive member of the Netherlands Association for Medical Education (NVMO) and a founding member of 'sanokundu' (an international community of practice dedicated to fostering health professional leadership education worldwide). Jamiu is a public speaker, writer, and

clinician educator. As a healthcare leader, he is a fervent advocate for DEI and social justice. He is a member of the University of Maastricht's advisory council on Diversity and Inclusion and associate editor for ICEnet Blog, Clinical Medicine and Research and Commissioning editor for BMJLeader. Jamiu's activities as a clinician and educator have been recognized through various awards, which include the Educational Leadership Award 2015 (World Education Congress), Clinician of the Year Award 2015 (Maastricht University), the International Residency Educator Award 2016 (Royal College of Physicians and Surgeons of Canada). In 2017, he received the Critics' Choice Award (Association for the Study of Medical Education) and the Jan Heijlman Prize for Best Teaching Specialist in 2022 (Vrije Universiteit, Amsterdam). In 2023, Jamiu was awarded an honorary fellowship by the Royal College of Physicians and Surgeons of Canada.

Jamiu is happily married and has two children, aged 15 and 12.
